

Build Your Own Golden Pollinator

Feeling crafty? Visit BOOtanical at night and pick up a golden pollinator kit at the end of your adventure. Use the items found in your kit to craft your own golden pollinator, just like the treasures stolen from the Herb Garden. Make sure to decorate your pollinator using at least one natural craft material like an acorn cap, leaf, twig, or flower. Then, snap a pic of your completed masterpiece and send it to us at <https://tinyurl.com/DIYGoldenPollinator>. One lucky entry will win an awesome prize package, including a FREE Garden Membership. What will you create?

Crafting Tip: There are no rules when it comes to creating your golden pollinator. The following steps are suggestions only. Use your imagination and create what inspires you!

- 1)** Arrange your beads to look like a bug. All insects have three body parts (head, thorax, and abdomen) but since this is fantastical creation of your own design, you get to decide how many parts you'll use. One, two, three beads—the choice is yours!
- 2)** Glue your beads together once you have them arranged how you'd like.

Crafting Tip: We recommend using a hot glue gun, super glue, or tacky glue to hold your golden pollinator together. Remember to ask an adult to help with this step!

- 3)** Next, add legs and antennae to your pollinator. Remember, all insects have six legs and most of them also have two **antennae** (the long, thin parts on the heads of bugs they use to feel and smell). Remember, you get to decide how many feet and antenna your pollinator has; there is no right or wrong way to create your insect.
- 4)** Finally, decorate your pollinator. You can add eyes, wings, a stinger, spots, stripes, or other decorative touches. The included sticky-stone gems can also be used to add a little bling to your pollinator.

Crafting Tip: Don't forget to include a natural material in your decorations! Consider using rocks, twigs, flowers, acorn caps, and more.
