# Back Yard Sudoku

Can you finish the puzzle below? Each of the four boxes must have one sun, one flower, one mushroom, and one ant. Each picture can only appear once in a row, column, or box.

# Critter Crossword

Use the clues on page 4 to complete this puzzle using animals you might find at Red Butte Garden.

A crossword puzzle grid with 28 numbered starting points for clues. The grid consists of white squares for letters and black squares for empty space. The numbers are: 1 (horizontal, top center), 2 (vertical, top right), 3 (vertical, left), 4 (vertical, right), 5 (vertical, right), 6 (horizontal, left), 7 (vertical, center), 8 (horizontal, left), 9 (horizontal, center), 10 (horizontal, left), 11 (horizontal, center), 12 (horizontal, right), 13 (horizontal, center), 14 (vertical, right), 15 (horizontal, left), 16 (vertical, right), 17 (horizontal, right), 18 (horizontal, center), 19 (vertical, center), 20 (horizontal, center), 21 (horizontal, left), 22 (horizontal, left), 23 (horizontal, center), 24 (horizontal, center), 25 (vertical, left), 26 (horizontal, center), 27 (vertical, center), 28 (horizontal, bottom right).

## Down:

1. This bird builds a dome over its nest and eats both plants and animals.
2. This mammal catches insects while flying and gets its name from the color of its fur.
3. This bird, with a comma-shaped feather on its head, was first brought to Utah in 1869.
4. Active at night, this animal likes to hang quietly in trees. Their babies are called porcupettes.
5. A tunnel digger that folds its lips around its teeth, allowing it to dig without getting a mouthful of dirt.
7. An insect that drinks flower nectar from a long, straw-like mouth part called a proboscis.
11. A solitary mammal whose favorite prey is deer.
14. This mammal lives in a den. Its fur turns white in the winter.
17. This animal is most active at sunrise and sunset. Its population has grown as the number of coyotes, its most dangerous predator, have decreased.
19. An insect that eats garden pests in its larval stage and drinks nectar as an adult. It's named after a delicate-looking body part.
20. This animal collects and buries acorns in the ground. The uneaten acorns grow into oak trees.
24. Bigger than a house cat, this creature's name comes from its short tail.
25. This animal builds nests up to 3 feet wide in trees or other high places. It hunts small mammals, reptiles, and fish.
27. This creature lives in water and feeds on insects. Its young are called fry.

## Across:

1. This animal is named for its large ears. It feeds on leaves, flowers, stems, and buds.
6. On average, this territorial bird weighs less than a nickel.
8. A harmless reptile that resembles its venomous relative.
9. This creature has 6 long legs to help it float on water. It uses its middle legs like paddles to move around.
10. This expert hunting insect will, if scared, spread its legs and wings to look bigger.
12. Two types of this mostly land-dwelling bird are found throughout Utah. They feed on insects, seeds, and plants.
13. A large bird that visits Utah in the summer and feeds on dead animals.
15. A spotted beetle that loves to eat aphids.
16. This insect can be identified by its short-lived adult stage and its rapid up and down flight pattern.
18. This animal is venomous but very timid. It's most likely to bite only as a last resort. It prefers to eat small animals, like rodents.
21. This animal has a shell and eats leaves with super-tiny teeth called a radula.
22. Utah is the furthest north this large spider lives.
23. This animal eats greens and is hunted by many predators. It runs away in a zig-zag pattern to confuse them.
25. This mammal eats plants and animals. It keeps its young warm with colorful coverings, often made of cotton.
26. This animal is smaller than a wolf. It captures other, small animals by jumping on them.
28. This animal is immune to snake venom. Its black and white stripes serve as a warning to predators.

# Fill in the Blank

Fill in the blank squares to spell out the different parts of a plant.
